

SQUARESPACE MODULE INDEX

PAGES & WIDGETS

AMAZON ITEM LIST

PAGE / WIDGET

Quickly search for and display products sold on Amazon.com. Authors can list their own books, watchmakers their own watches sold through Amazon, or list recommended products that compliment your site topic or services. Add your Amazon Affiliate ID to get commissions on sales initiated from your site. [MORE](#)

CHANGE TRACKER

PAGE / WIDGET

The Change Tracker module was designed to keep your visitors up to speed with changes on your site. It can be configured to display changes from specific page/content types, or from any changes site wide. [MORE](#)

DELICIOUS

WIDGET

With the Delicious social widget module, you can add and display Delicious Bookmarks in your sidebar automatically, and use the built-in controls to style how the bookmarks will appear on your site. [MORE](#)

DISCUSSION

PAGE

The Discussion module is the Squarespace forum module. As its name suggests, it is an excellent way to facilitate discussions on your site. You can use it for member-run support for your products, share discussion questions with your online community, or just have an open forum for whatever visitors want to talk about. [MORE](#)

DROP BOX

PAGE

The Drop Box module lets visitors upload files to your site. [MORE](#)

FAQ

PAGE

The FAQ module is a great way to share information with your visitors. Setup categories, sort, and organize entries to help people find answers to the types of

questions they have. If you are a business, this can be a great time-saver by preemptively answering questions that would otherwise go to your sales or support staff.

[MORE](#)

FILE STORAGE

PAGE

The File Storage module allows you to easily upload and share files on your site. [MORE](#)

FLICKR

WIDGET

The Flickr social widget module is an easy way to import images into your sidebar. You can use the settings to configure a grid layout or interactive slide show. [MORE](#)

FOLDER

PAGE

The Folder module allows you to organize pages and links by nesting them within a folder. In your sidebar, folder contents can easily be expanded or collapsed to aid visitors in navigating your site. In a horizontal top menu bar, folders become instant drop-down menus. Folder modules can also be set up to show an overview of contents with descriptions when directly clicked.

[MORE](#)

FORM

PAGE

The Form module allows you to easily create forms to collect user information on your site. All data can be stored directly to Excel files in your sites file storage area and/or sent to you via email. Build complex forms like job applications, or simple 3-step sign up forms for events, email newsletters, and more. [MORE](#)

GUESTBOOK

PAGE

The often forgotten Guest Book module is an open feed where anyone can share a quick message on the site. Let friends and family share congratulations for your

wedding or your wild rock band fans share their praises. Short-and-simple means more people will engage in the discussion. [MORE](#)

HTML PAGE / WIDGET

The HTML module is one of the most commonly used modules. It is perfect for simple pages and widgets that only contain text, images, and/or videos. Don't let the name worry you, you don't need to know how to code HTML to use this module; you will be able to use our simple WYSIWYG editor for adding content. [MORE](#)

JOURNAL PAGE

The Journal Module is primarily a blog module, but its uses go far beyond simple blogging. Artists may find it useful for building a portfolio. Real estate agents would use it to list their properties for sale with images. Parents may enjoy it as a way to keep extended family up-to-date on the kids' activities. [MORE](#)

JOURNAL INDEX PAGE / WIDGET

The Journal Index (or Journal Archive) module allows your visitors to easily find posts by month, category or tag, or individually. It can also show the most recent entries from a given Journal. [MORE](#)

LINKS PAGE / WIDGET

Share links on your site with this easy-to-use module. Display a simple list, or organize your links into separate groups. [MORE](#)

LOCATION WIDGET

The Location social widget module is an easy way to import and display your check-ins from Gowalla, Foursquare and Facebook Places, and display them on your sidebar. [MORE](#)

LOGIN PROMPT PAGE

Displays a login prompt for registered users to login to your site. [MORE](#)

MAP PAGE

The Map module quickly integrates an embedded Google Map. It is commonly used to share an office location to help customers find your business. [MORE](#)

PICTURE GALLERY PAGE

The Picture Gallery module allows you to quickly and easily display images on your site. Setup multiple galleries to organize your images, add descriptions, and create basic slide shows. [MORE](#)

POWERED BY SQUARESPACE PAGE / WIDGET

Let visitors know that you're proud to be "Powered by Squarespace" with a stylish banner or button. We surely appreciate your pride, and offer plenty of stylish options to choose from. [MORE](#)

REGISTRATION PAGE

Displays a registration form for new member sign ups. Automate your member sign up process by allowing potential members to sign up on their own (as opposed to manually adding users through the website management). [MORE](#)

RSS WIDGET

With the RSS social widget module, you can add and display RSS feeds in your sidebar automatically, and use the built-in controls to style how the feed will appear on your site. [MORE](#)

SEARCH PAGE / WIDGET

The Search module provides a search box that allows visitors to search your sites content. It can easily be configured to only search certain pages or content types. A search results page is automatically created to display relevant content. [MORE](#)

SEND AIM WIDGET

Simple prompt that opens a visitors AIM client so they can send you an instant message (chat). [MORE](#)

SEND EMAIL PAGE / WIDGET

Easily allow your visitors to send you an email message. Great for keeping your email account secure, while providing a convenient way for clients, customers, or visitors to communicate with you. [MORE](#)

SINGLE LINK WIDGET

As the name suggests, the Single Link module allows you to share a single link. Don't be fooled though, this

module comes in handy when you need to share your page links in a secondary menu or share off site links in your main navigation menus. [MORE](#)

SOCIAL LINKS

WIDGET

With the Social Links widget module, you can display your own social networking profiles and those of your site members easily within your site. [MORE](#)

SYNDICATED RSS

PAGE

Your dynamic pages (Journals, Picture Galleries, etc.) automatically generate data feeds (RSS Feeds) that can be subscribed to. This module displays a list of your RSS feeds to make it easy for visitors to subscribe using their preferred RSS reader. [MORE](#)

TAG CLOUD

WIDGET

The Tag Cloud widget module is an easy way to display a tag cloud into your sidebar. You can use the settings to display your journal's tags, categories, or both. [MORE](#)

TWITTER

WIDGET

Add a Twitter social widget module to pull your Tweets and automatically display them in your sidebar. Choose the format options to decide how you want these to appear, and what information you want to show. [MORE](#)
